

Side Valance & Quarter Fenders

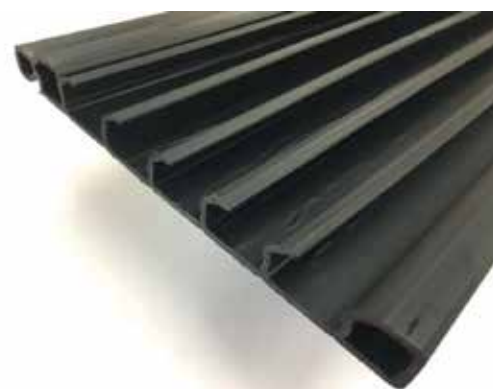

Quarter Fenders

- Reinforced fixing points for fitment directly to the underside of the vehicle
- Injection moulded HD-PE, high impact strength and UV resistant
- Can be used as an individual fender, or in conjunction with the netrout side valance

Netroute Side Valance

- Single Construction Side Valance
- Widely fitted by many major European Fridge Trailer Builders
- Complies with European Directive (EU)109/2011
- One piece valance supplied in 4 metre lengths
- Extruded from HDPE, high impact strength and UV resistant Available in 2 depths
- For speed and ease of fitment there are 3 types of aluminium rail available, the valance simply slides into the rail
- All rails supplied in 4 metre lengths
- Homologation No. Ae2 00 15163

IMPORTANT When cutting/trimming Netroute, **DO NOT** remove the e-mark stamping. Doing so will invalidate all legal and type approval requirements.

Part No.	Width (W)	Length (L)	Depth (D)	Description
F-4640	460mm (18")	-	400mm	Quarter Fender
F-4660	460mm (18")	-	600mm	Quarter Fender
F-150102	-	4000mm	100mm	Side Valance
F-160049	-	4000mm	150mm	Side Valance
F-961248	-	4000mm	-	Mounting rail – for Side Surface Mounting
F-961249	-	4000mm	-	Mounting rail – for fitment under vehicle body
F-020647	-	4000mm	50mm	Mounting rail – extended rail for fixing to underside of vehicle body. Increases overall valance depth to 200mm when used with Valance part no F-020154
